

ANEXO B

Este anexo contém as informações das antenas utilizadas na campanha de rastreamento GPS da Rede geodésica de Minas Gerais, necessárias para determinar as alturas dos centros de fases em relação ao ponto que materializa a estação.

Os arquivos *meraset.aif* e *ant_inf.001* são utilizados pelo programa OMNI. Os dados de calibração das antenas mostrados abaixo, foram extraídos da página: <http://www.ngs.noaa.gov/ANTCAL> . (Acesso em 07/01/02).
